skeans.com

To our valued Customers,

In 1968, John A. Skeans had a dream...“total compressed air products supply”. He opened at 1475 Howe St., Vancouver, BC with operating partner (engineer) Mr. Cliff Moore and investor (friend) Mr. Robert Crosby. Dad’s idea was to provide local service and inventory for customers in British Columbia. Having sold locally manufactured sawmill equipment, he saw the need for local cylinder manufacturing and product placement in sub-distributors at 10 cities throughout B.C. “Make it easy for the customer to do business” was his motto.

Today, over 50yrs later, this same motto continues to ring true in 7 branches across Western Canada. Three generations of the Skeans Family and over 50 staff continue our father’s legacy. We are proud to serve you, our supportive customers with three divisions, Compressor Room Solutions, Pneumatic Automation Solutions, and Electric Automation Solutions. We provide a unique and complete solution ‘to optimize our customers potential’.

*Thank you for your new and continued business!
With gratitude,*

J. Tim Skeans - President

Compressor Room Solutions

- Complete compressor room design with system efficiency in mind, SKEANS has the right products for each application and industry
- Compressed air system energy audits, leak detection and comprehensive 'SMART' controls
- 24/7 factory trained service and parts support

Electric Automation Solutions

- Wide range of electric products for your automation needs, from simple relays to advanced robots
- Local technical application specialists can help you select the best solution for your project
- Safety audits, products and solutions
- Schedule a product demonstration to see any of our wide range of solutions

skeans.com
