

Automation Safety Solutions

FRAME-WORLD Structural Aluminum Guarding

SKEANS offers a wide selection of aluminum extrusion profiles and connecting brackets, fasteners and accessories which provide limitless possibilities in assembly and design with significant savings over welded fixtures. SKEANS carries Frame World for all your Aluminum Guarding solutions. Frame World offers complete solutions for machine guarding such as complete turn-key solutions for machine guards, frames, enclosures, racks, workstations & more. This is the simplest solution available and it helps you save tremendous labor costs.

- > Turn-key solutions for machine guarding or bases
- > Safety Hinges + Light Curtains Available

- > Available assembled or in a kit format
- > Cost effective with tremendous labour savings

ROSS Safety Valves

SKEANS carries ROSS Safety Valves including Ross' L-O-X Valves, Stainless Steel Lockout Valves, Control Reliable Double Valves, Safety Rod Locks, and Hoze Fuzes. Most ROSS safety products are third party certified and are self-monitoring. Not only do these products offer a safer work environment but their lockout and stopping times are half of that of other valves, meaning increased plant productivity for the user.

- > Category 3 + 4 safety products
- > Valves easily identified by yellow and red bodies

- > Boost safety + productivity
- > Third party certified

To receive a Safety Audit please contact UBSafe Inc. at 604-205-9080 or email them at safety@ubsafe.ca today!

HANSEN
QUICK COUPLINGS

HANSEN Flow Sensors & G-plugs

SKEANS offers Hansen Flow Sensors which are designed to protect personnel and property in case of hose failure and are intended for use with compressed air. The device automatically shuts off air flow to any ruptured hose, which reduces the risk of injury or damage from hose whip. The device has a 250 psig pressure rating and a low pressure drop, while automatically resetting after failure correction.

- > Compact, economical, tamper-resistant designs
- > Operates in any orientation
- > Industrial interchangeable 'G'-plugs to prevent hose whip
- > 250 psig pressure rating
- > Low pressure drop

LEUZE Scanners, Sensors, Light Curtains

SKEANS carries Leuze, a German company specializing in Sensors, Light Curtains, Safety Switches, Area Scanners, and Control Relays. Leuze is known for its reliability and efficiency and produces products that have the highest durability rating in the industry under the toughest conditions. Leuze offers cost-effective and flexible safety devices that will greatly improve the safety standards of your workplace environment.

- > Devices suitable for safety category 4
- > Durable and reliable designs
- > Maintenance-free devices
- > Easy Device Configuration

 **MURR**
ELEKTRONIK

MURR Safety Controls, Emergency Stop Buttons

SKEANS offers Murr Elektronik for all your passive electrical safety applications. Murr's safety products include Safety Relays, Safety Controls, Safety Wiring, and Emergency Stop Buttons. Murr's safety division represents a milestone on the road to safety technology. To learn more please visit the SKEANS website today!

- > Easy Installation
- > Low maintenance and easy to service
- > Complies with CAT 3 + 4
- > Impressive technical & financial advantages

ROSS Safety Clamping Devices

ROSS CONTROLS specializes in pneumatic and automation safety solutions. Their safety clamping devices division includes Safety Locks, Safety Brakes, and Safety Catchers. For any of your Safety Clamping Device needs look to ROSS for optimal performance.

- > Third Party Certified
- > Absolutely highest holding force
- > Provides optimal protection in any application
- > Compact design
