

CNC Machine Tending

Important questions:

- Is your payload under 16kg? Then Cobots are right for you!
- Is your cycle time greater than 10 seconds? This may change your reach requirements.
- Is your reach less than 4 feet?
- Do you have the ability to interact with the machine?

Machine Tending Application Packages

The UR+ program provides ease of use and peace of mind by bringing together hardware, software, and application packages certified to integrate easily with the UR system. Please follow the link and check out the Machine Tending application packages on Universal Robots has on offer.

If you can't find what you're looking for don't hesitate to reach out to our sales team.

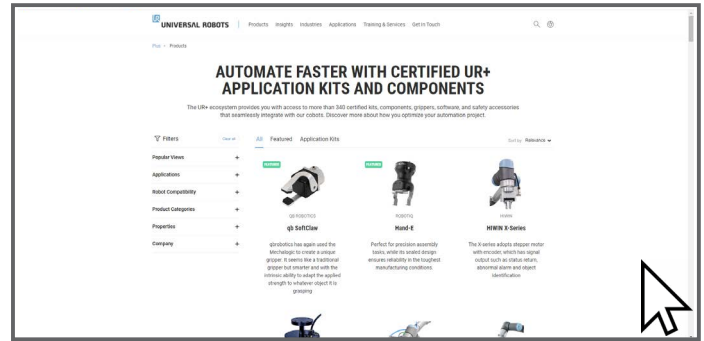

Call at **604 549 6213** or email mattw@skeans.com, for more information.

Tools & Information:

Universal Robots' Cobots are compatible with a wide variety of grippers and end of arm tooling. Additionally, Skeans distributes a number of options beyond what UR has listed. Please follow the link if you'd like to know more about their end of arm tooling options.

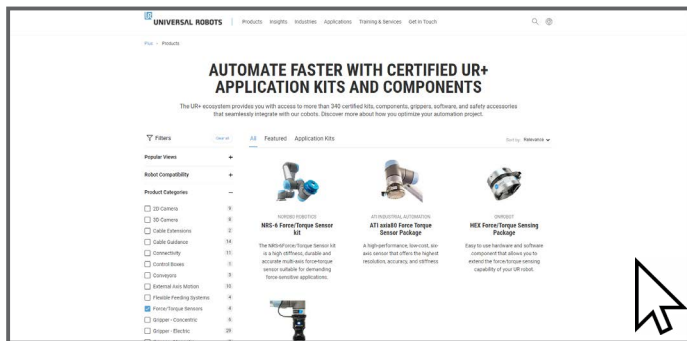

Let us know if you can't find what you're looking for. We're here to help you find a solution!

Grippers - Electrical, Pneumatic, Vacuum, Magnetic

All Universal Robots' Cobots come with force torque sensors built-in. There are also UR+ software packages that provide additional functionality and ease of use to get more value from this sensor. This enables them to perform force sensitive tasks, and to precisely detect and measure robot contact.

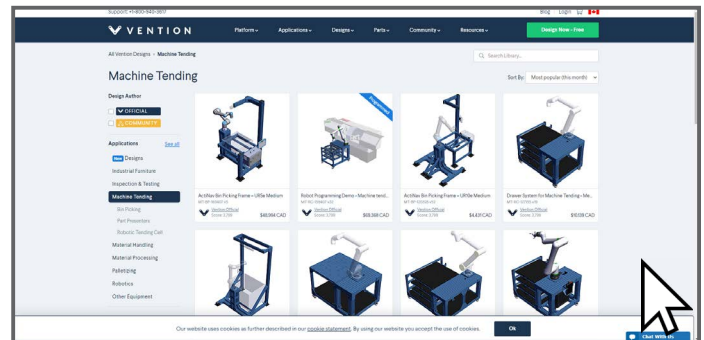

Follow the link and you'll see some of the options they have available.

Force Sensor Software

For Universal Robots there are a number of fixture, tools, or jigs available. We recommend Vention stands for the first place you look. Vention has pre-built and custom designs that are perfect for almost any Cobot application.

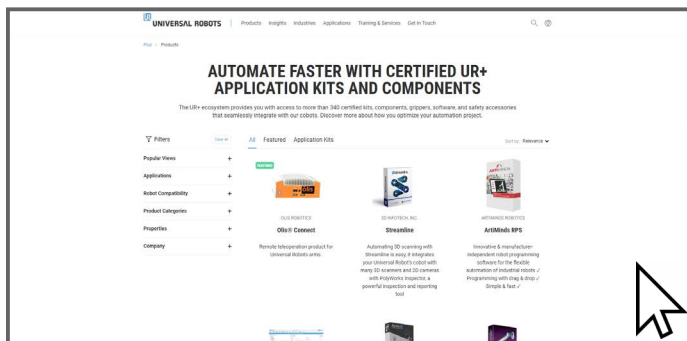

Please follow the link and see what Vention has to offer. As always if you can't find what you're looking for, please contact our sales team.

Fixture options / Tools / Jigs

All Universal Robots' Cobots come pre-installed with the latest software and are ready for quick updates to keep them up to date. However, for some of the more challenging applications Universal Robots has a selection of custom application software available.

Please follow the link to see what they have to offer. If you can't find what you're looking for, please reach out to our sales staff.
